PROJECTS

React Native Mobile App – Senior Design Project II (CS-599)   *September 2022*
- The mobile app is a workout tracker that allows for the tracking and sharing of workouts.
- Used MVVM design architecture for Frontend.
- Used GraphQL and WatermelonDB for the Backend and Database.

Discord Music Bot   *April 2023*
- Developed a dynamic Discord bot using Discord.js that allows users to play music in voice channels for others to listen along with.
- Users are able to prompt the bot to play audio with a link to a video/audio source.
